TEK-CLAMP 1200A-100H
Handheld Ultrasonic Flow Meter

www.tek-trol.com
Introduction
Tek-Clamp 1200A-100H Handheld Ultrasonic Flow Meter is a completely non-invasive ultrasonic flow meter. The flow meter uses the ultrasonic signal to measure the flow rates with the transit time method. It consists of the built-in data logger for over 2000 lines of data and is optional as an external data logger. Tek-Clamp 1200A-100H has a pair of transducers capable of measuring flow rates in pipes from 1/2” (12.5 mm) to 28” (700 mm) at temperatures of between 32°F (0°C) to 320°F (160°C). This flow meter can be virtually applied to a wide range of measurements. A variety of liquid applications contain potable water, cooling water, river water, raw sewage, reclaimed water, plant effluent, ultra-pure liquids, chemicals.

Measuring Principle
When the ultrasonic wave is transmitted through the flowing liquid, the difference between the upstream and downstream transit time (travel time or time of flight) can be calculated, which is proportional to flow velocity.

![Diagram of Tek-Clamp 1200A-100H Handheld Ultrasonic Flow Meter](image)

The formula for calculating velocity is:

\[ V = \frac{MD}{\sin 20} \times \frac{\Delta T}{T_{up} \times T_{down}} \]

Where,

- \( \theta \): Includes angle to the flow direction
- \( M \): Travel times of the ultrasonic beam
- \( D \): Pipe diameter
- \( T_{up} \): Time for the beam from upstream transducer to the downstream one
- \( T_{down} \): Time for the beam from downstream transducer to the upstream one
- \( \Delta T = T_{up} - T_{down} \)
Features

• Better than ±1.0% accuracy.
• Pipe diameters from 1” to 28”. 
• Protection class: IP67 for Flow Transducer.
• 4×4 key Touch Membrane Keypad.
• 3 AAA built-in Ni-MH batteries 1.2V(for over 12 hours of operation). 90V-260V AC Adapter.
• 4×16-character LCD with backlight.

Application

• Power plants
• Water and Wastewater treatment plants
• Mining and metallurgy plants
• Petroleum process monitoring and control
• Chemical process monitoring and control

Installation

Tek-Clamp 1200A-100H Handheld Ultrasonic Flow Meter can simplify the ultrasonic flow meter installation process, by shortening installation time and improving installation accuracy. TEK-CLAMP 1200A -100H Handheld Ultrasonic Flow Meter installed by two methods:

• Clamp-On Transducer
  - Install the Tek-Clamp 1200A-100H Handheld Ultrasonic Flow Meter (with magnet) on the pipe. It can help finish the flow measurement without any pressure drop. Also, the need for cutting the pipe is eliminated.
  - Tek-Clamp 1200A-100H Handheld Ultrasonic Flow Meter measures pipe size from ½” to 28”.

• Clamp-On Mounting Bracket Transducer
  - Install Tek-Clamp 1200A - 100H on the pipe, to finish the flow measurement. The need for cutting pipe gets eliminated.
  - Several types of bracket Tek-Clamp 1200A - 100H are used to measure pipe size from ½” to 28”.
  - Several types of bracket Tek-Clamp 1200A -100H are used to measure temperature range from -22°F to 320°F (-30°C to 160°C).

Tek-Trol is a fully owned subsidiary of TEKMATION LLC. We offer our customers a comprehensive range of products and solutions for process, power and oil & gas industries. Tek-Trol provides process measurement and control products for Flow, Level, Temperature & Pressure measurement, Control valves & Analyzer systems. We are present in 15 locations globally and are known for our knowledge, innovative solutions, reliable products and global presence.
